DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

Claims 1-21 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art fails to teach setting the first writing power as an initial value and changing the first writing power by a dense degree through steps corresponding in number to that of the calibration areas divided by the dense unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lee et al. (US 2001/0007546) teaches the use of a reference power in power control operations.

Honda (US 6963525) teaches a β value of $(a+b)/(a-b)$.

Hsiao (US 6738329) teaches finding a recording power using a plurality of steps.

Nishimura (JP 2000-311341) teaches establishing a reference power and performs test recordings around this value.
